Although the month of June is running to end, we still want the 'Hope-Family' to be informed about what happened in May at and with HCE.

The Internet blackout and the poor connection in Ethiopia prevented us to bring you the updates sooner.

Please read the updates and send us your feedback and questions through our email address [hopeforchildren.et@gmail.com](mailto:hopeforchildren.et@gmail.com)

HOPE FOR CHILDREN IN ETHIOPIA  
Relief & Development Association

Meet Meron! A young woman rescued from domestic destitute. For those who did not know Meron six months ago, the smile on her face might not mean anything but for her and for family it means everything. After joining the Self Dependency Project, Meron is now getting life skill training and Leather Production Skill training. When she graduates, Meron will be a certified leather specialist and more importantly, a well-rounded, bright young woman!

There are many like Meron, whose lives are being transformed through the Self Dependency Project at HCE. Meron and the other young women are now hopeful about their future. Your support makes it possible for these young women to change their lives forever!

#### HOPE FOR CHILDREN IN ETHIOPIA KINDERGARTEN

---

Nearly 100 children are being educated through HCE's KG program, one dollar a day sponsorship program. Through sponsorship, we have managed to support the families of these children, to keep them with their family and prevent the children from being pulled or pushed to the streets.

Although we are happy to see the impact the KG brought in the community, we want to do more. Currently, we are renting the compound. HCE wants to one day own a safe and suitable compound to serve children.

HCE is raising funds to build a school where underprivileged children get an excellent education in a safe and conducive environment

### **Street youth in Vocation**

The street youth rescued from the streets are following their construction and finishing work training. In May, they have finished the first level, took an exam. Each student passed and are moving on to the second level! It is such an exciting experience to see the efforts bearing fruit.

HCE implement these projects with the support of partner individuals and organizations. We want to acknowledge and thank you all for the dedication, generosity and love you keep showing for these children, teenagers and youth!
